COLOR TECHNOLOGY

Lively Natural Bronzing Lotion: Banana, Melanin and Caramel help instantly deliver darker color results. DermaDark® helps to stimulate the melanin production for deeper and longer lasting results.

- **Banana Extract:** Aids skin tanning properties by supplying dopamine to the skin, which is a melanin precursor, allowing darker color development.
- **Melanin:** Strong antioxidant that has the capacity to absorb UV radiation, preventing harmful cell damage, while also providing instant, natural color to the skin.
